

Dear Industry Leader,

NSCC-IT Campus is a leader in the fields of trade and technology. Among the various clubs and associations at NSCC, we have an ROV team as well. **ROV** stands for **Remotely Operated Vehicle** and it is our goal this year to build an underwater ROV to compete in the International ROV Competition in June, 2010. This competition is organized by MATE (Marine Advanced Technology Education Center) based out of California, USA.

Besides designing and building an ROV, the purpose of this team is to unite engineering students of different trades. We realize that in the real world, different trades have to work together to accomplish great things. The ROV team has developed a sense of pride among a small group of students, but we want to make the surrounding community proud as well.

The ROV we built has already been entered in a qualifying round for the competition and we passed with flying colours! The students involved have invested many of hours into the ROV so far and we have no doubt that our ROV will stand up to the competition, but we need your help to fund this journey. We are looking to our local community for support.

Help us get to the competition so we can represent Nova Scotia to the best of our abilities.

We are requesting donations of \$25, \$50, \$100, \$250 and \$500. Any charitable donation above \$500 will receive a receipt. In recognition of your donation you will receive a certificate of appreciation from us. Thank you in advance for your generous support and for the opportunity to display our skills.

The NSCC ROV Team
